

ABSTRACT OF THE DISCLOSURE

5 An operation data creating method and
apparatus for creating operation data indicating
with respect to each base station other base
stations related to each base station, based on a
communication quality level with respect to each
base station at each local position within a service
area in a mobile communication system which includes
a plurality of base stations set up within the
10 service area and a mobile station which makes a
wireless communication with the base stations, by
creating quality information indicating the
communication quality level with respect to each
base station at each local position within the
15 service area, selecting base stations having a
second or subsequent communication quality level at
each local position where the same base station of
interest has a highest communication quality level,
based on the created quality information with
20 respect to each base station at each local position,
and creating the operation data indicating the
selected base stations as the other base stations
related to the base station of interest having the
highest communication quality level.
